SPORTSWEAR AND SUBLIMATION

MOANA sport

Where Pride Shows

Moana Clothing want to take you on a journey of rediscovery, unleashing what makes you, your team or your school unique

A manufacturer and designer of schoolwear, sportswear and corporate wear established in 1994, we are a NZ owned and operated company located in the heart of Miramar, Wellington

We pride ourselves on customer relationship building and maintenance. We believe in sustainability and ethical principles by making quality products that last, using carbon transport, such as sea freight, where possible and recognising the importance of working conditions for both ourselves and our manufacturers. We annually audit our factories to ensure staff well-being and safety.

With an in-house design team that can take any concept and turn it into reality, drawing up some pretty awesome concepts from scratch or faithfully replicating what you already have for production. We are well equipped to assist with any ideas that come to mind.

Don't hesitate to get in touch with our awesome team here at Moana Clothing, we'd love to hear from you and you'll see that Pride Shows in all our work.

What Is Sublimation?

Sublimation is a method of applying a printed design to a garment. This involves a process using heat and pressure to transfer the design from paper to the surface of the fabric, thus giving you total freedom over the design and colour of your gear

Why Go With Sublimation?

Sublimation is great for a number of reasons including the fact that it's super versatile. This means you can have a design as elaborate as you like and using any possible combination of colours

Sublimation also prints everything at once, including names, numbers and logo's. This means you can add as much detail as you like without affecting the overall cost or quality. Because the details are transferred as part of the complete design it keeps the gear light, allowing your team to play at their best while looking their best

What Are The Benefits Of Sublimation?

The main benefit of Sublimation is that design possibilities are virtually unlimited. From simple shapes and colours to blends, shadows and photographic images. Because your design is now part of the fabric there's no risk of cracking, fading or peeling. Since every detail is part of one print this avoids having massive plastic numbers etc weighing the gear down

What Is The Process Of Producing My Design?

Here at Moana Clothing we always aim to produce the highest quality possible. In order to achieve this with Sublimation it is essential that any images sent to us are high quality. Our team will assist you through the whole process from concepts, physical samples and anything else you may need in order to produce the best for your team.

We can also copy and re-make existing designs to the smallest detail

The more detail you provide the better the final design will look!

Please be advised: due to the different colour resolutions computer monitors display, colours can vary from screen to screen. The best way to avoid this is to use Pantone codes or sending us a physical sample of the colours you wish to use
